6d. Describe how you plan to construct each project element checked in 6c. Include specific construction methods and equipment to be used. [help]

- Identify where each element will occur in relation to the nearest waterbody.
- Indicate which activities are within the 100-year flood plain.

A Double SS 175 Helix anchor system with mooring buoy will be professionally installed by Alpha Marine Installations in accordance with the requirements defined by the Washington State Department of Natural Resources and as outlined in the recreational mooring buoy design and use requirements. See the attached Vicinity Map, Plan View, Elevation Drawing and related maps for visual details.

6f. Describe the purpose of the work and why you want or need to perform it. [help]

I would like to anchor my boat in front of my private waterfront property. Mooring buoys are the preferred method of anchoring recreational vessels and are non-invasive to the environment compared to docks or pilings. In particular, helix anchoring system disturbs no more than one square inch of marine floor and provides better performance and anchoring safety versus alternatives, such as concrete blocks or other traditional alternatives.

6g. Fair market value of the project, including materials, labor, machine rentals, etc. [help]
